

Job Description

As a Software Engineer at SquareBoat, you need to have:

- Basic working knowledge of PHP, MySQL, HTML/CSS, Javascript
- Basic understanding of how the Internet works (DNS, browsers, web-servers) etc.

Work Details

- Your work will involve software development using web and mobile technologies like PHP/Laravel, MySQL, Node.js, MongoDB, React, Angular, Ionic, AWS etc.
- You will be assigned independent project modules, which you will start from scratch and will be given complete responsibility of code and final delivery

You need to have:

- Bachelor's or Master's degree in Computer Science, Computer Engineering or a related technical discipline (Final year students only)
- A good understanding of the software development lifecycle
- Some interesting side projects you have done or a Github profile with real open source contributions will be a big plus

Benefits

- Working with the latest web technologies in an early-stage product startup, with plenty of opportunities to learn
- You will work directly under the mentorship of other senior designers/developers and the startup's founders

Skills

- Laravel, Nodejs, Python, React, Angular, MySQL, MongoDB, Firebase, Elastic Search, Docker, AWS etc

Perks:

- Macbook - The world's best laptops + 22 inch LED Monitors for everyone
- Office Parties -We celebrate everything from birthdays to work anniversaries and success stories!
- Gaming Zone - Playstation, Table Tennis and plenty of more games to relax and have fun
- Annual Trips - Once a year, we forget everything and travel like there's no tomorrow.
- Hackathons - Annual 24 Hour Hackathons with some great ideas and prizes!
- Weekly Tech

Talks- Knowledge is the only thing that grows when it's shared.
