Our Company

Nucleus Software is one of the first FinTechs born in India and is the leading provider of lending and transaction banking solutions to the global financial services industry.

ABOUT US

Its software powers the operations of more than 200 financial institutions in 50 countries, supporting retail banking, corporate banking, cash management, internet banking, automotive finance & other business areas.

Our end-to-end Loan Lifecycle Management platform FinnOne Neo™ is a comprehensive product suite built to digitize the lending operations of the global banking and financial services industry.

FinnOne Neo is an agile and customer-centric platform capable of servicing the entire loan cycle.

Our cash management solution FinnAxia caters to Global Receivables, Global Payment, Global Liquidity, e-Financial supply chain management and Business Internet Banking providing flexible, speedy & efficient execution of cash management processes.

We also offer solutions to customers in the areas of digital transformation and digital optimization.
