About this position

We are looking for PHP developers to build web solutions using mainly WordPress CMS/framework for our large enterprise clients such as Google, Facebook, IndianExpress, Al Jazeera that are used by millions of people every day.

Responsibilities

- Deliver secure, scalable, and easy to maintain WordPress solutions using engineering best practices and relevant coding standards.
- Write test cases for all the code you develop.
- Write and maintain technical project documentation including inline code commenting, Git repo readme, and clear commit messages.
- Respect timelines and communicate progress proactively. We are a remote team, so proactive communication is very important.

Must Haves

- Solid understanding of computer science fundamentals and web/internet.
- Good PHP programming skills
- Decent knowledge of HTML, CSS, JavaScript, MySQL
- Version control software such as git
- Architectural concepts such as background job processing

Good to Have

- Knowledge of WordPress plugin and theme development
- Package managers such as composer
- Experience with web servers e.g. Nginx, Apache
- Unit testing frameworks
- Some understanding of hardware (CPU, RAM, Motherboard, etc)
